

Pharmacy Residency - PGY2 Ambulatory Care Pharmacy Residency

The residency is designed to develop an expert in ambulatory pharmaceutical care. The resident is part of an interdisciplinary team providing chronic disease management for individual and shared medical appointments. The residency promotes individual development, self-reliance and responsibility to the patient. Management skills are emphasized through precepting. Development of new programs, clinics and research is expected. The resident is prepared to serve as a clinician and a teacher/consultant in an ambulatory care setting.
